

Gershow Recycling Donates Aluminum Scrap to KPHS Robotics Team

Each year, Gershow Recycling has opened its Medford facility to local FIRST® (For Inspiration and Recognition of Science and Technology) Long Island robotics teams, including coaches, students and their parents, to enable the teams to collect aluminum scrap metal. The team members will use the aluminum to help them build a 120-pound robot, which will be used during the upcoming FIRST Long Island Regional FIRST Robotics Competition, presented by School-Business Partnerships of Long Island, Inc. (SBPLI).

The Kings Park High School FIRST Robotics Competition Team (#5736) was one of 15 local robotics teams that took advantage of the program and visited Gershow on December 3, 2016. Following the 2017 FIRST Robotics Competition kick-off that took place on Saturday, January 7 at Stony Brook University, each of the teams has six weeks to construct the robot and prepare for the upcoming competition.

Sam Kruse, co-mentor of the Kings Park High School FIRST® Robotics Competition Team (#5736), is joined by Jonathan Abrams, Manager, Gershow Recycling during a Scrap Metal Pick-Up event held at Gershow's facility.
